## *Volunteer Program Information*

Thank you for your interest in serving the County by becoming a volunteer. We think volunteerism is a wonderful opportunity for people to get involved in the betterment of our community. When citizens help other citizens, then Carroll County is able to grow and prosper and everyone benefits.

Carroll County is a dynamic, professionally-managed, local government, and we are delighted when citizen volunteers come along-side our efforts in the same professional manner. You are strongly encouraged to complete your assignment in a way that will bring a sense of pride to yourself and those you serve.

Volunteers serve on an at-will basis. Either the volunteer or the County may end the volunteer relationship at any time and for any reason. Due to changes that sometimes occur, volunteer positions are at times changed or eliminated. If, after you begin your volunteer assignment you find you are no longer able to complete the task, then please let us know.

All volunteers are expected to abide by County rules, regulations and policies, along with the laws of the Commonwealth of Virginia. During the course of an assignment, a volunteer may be exposed to confidential information. It is an expectation of all volunteers to keep such information confidential.

Volunteers will be assigned to provide services under the direction of a County Department Head or another staff member. These persons are expected to treat you with respect, and it is expected that you will also treat them, other County employees and citizens with respect.

Volunteer services are provided without the expectation of compensation by the volunteer. Supplies and other incidental costs incurred may be paid by the County.

By working together, Carroll County and its citizens will enjoy great rewards. Thank you again for your interest in becoming a Volunteer.
