Notice to Consumers  
Of the  
Tower Road  
Waterworks ID No. 1035745

We have been advised by State Health Officials of a failure to perform required monitoring in accordance with the Commonwealth of Virginia/State Board of Health Waterworks Regulations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During the month of February 2015, we did not monitor for coliform bacteria and chlorine residual concentrations and therefore we cannot be sure of the quality of our drinking water during that time.

One routine sample was required for analysis and none was analyzed.

State health officials feel there is little need for concern about the safety of your water because past records show that our waterworks has had no documented problems with bacteriological contaminations; however, routine sampling and examination are required to determine the quality of water delivered to our customers.

**There is nothing you need to do at this time.**

We will attempt to collect and have analyzed the required number of bacteriological samples in the future.
